

ARKI SPOT 195

Floodlight designed for architecture illumination. IP67 class body is made of aluminium. Standard colour RAL 7016 any other on request. Wide selection of optics allows to comply with all lighting designer ideas in both historical and modern architecture illumination. Variety of drivers: standard EVG on/off driver, DALI or DMX on request. Selection of optics, lumen outputs and drivers allows to use this luminaire in different types of lighting projects. Mounting on any type of ground. Standard luminaire is not intended for use in increased corrosivity category environment, e.g. with increased salt concentration. Extra corrosion protection is available on request.

Luminous flux & Luminaire Power tolerance up to 10%. System power consumption depends on components used. Luminous efficacy depends on type of LED's, electronics, optics and diffusor. The most up to date technical parameters can be found on our website and in database of LDT files.
